Fire Protection

## Wet Chemical

The fire fighting power and user friendly design of the Badger Wet Chemical portable extinguishers make them the ideal choice for commercial restaurant applications.

These stored pressure extinguishers are suitable for use on combustible cooking media and offer the very best in portable fire protection.

Available in two sizes, 6 liter and 2½ gallons, both meet the Class K test requirements and are designed to supplement pre-engineered restaurant suppression systems.

### Features

- Available in two sizes, 6 liters and 2½ gallons
- Chrome plated brass valve, stainless steel cylinder, handle, lever & pull pin
- Incorporates non-metal finger guard for safer operation and protective nozzle orifice seal to prevent nozzle blockage
- Color coded labels for instant type recognition
- Re-designed label incorporating easy to follow instructions and larger fire pictograms

### Class K symbol

Due to new and improved cooking appliances, higher heating rates and industry trends towards using more unsaturated oils, the potential for severe restaurant fires is greater than ever. The 1998 edition of NFPA-10 contains a new Class "K" extinguisher rating to specifically identify and address these commercial "combustible cooking media" fire hazards in kitchens.
